

Next Steps on National Cyber Security Plan

National Cyber Security Plan

NATIONAL CYBER SECURITY PLAN

- A new National Cyber Centre
- A stronger Active Defence Programme
- A new Institute for Coding: Centre for Digital Skills and Computer Science
- A new programme to build cyber skills for the future in Britain.
- A stronger regulatory framework
- A stronger cyber sector

**NATIONAL CYBER SECURITY STRATEGY
2016**

National Cyber Centre

A NEW NATIONAL CYBER CENTRE

Based at GCHQ in Cheltenham the new centre will house the country's first dedicated 'cyber force' to handle cyber incidents in Britain, and ensure faster and more effective responses to major attacks.

The centre will draw on GCHQ's world-class expertise and work with international partners to help keep the UK protected against cyber-attacks.

A stronger Active Defence Programme

A STRONGER ACTIVE DEFENCE PROGRAMME:

Exploring whether internet service providers can work together, with government help, to divert more malware attacks and block bad addresses used against British internet users.

A renewed crackdown on cyber-criminals, with increased capabilities for the National Cyber Crime Unit.

Institute for Coding: Centre for Digital Skills and Computer Science

A NEW INSTITUTE FOR CODING: CENTRE FOR DIGITAL SKILLS AND COMPUTER SCIENCE

To enable training of the nation's next generation of coders, the government will launch a competition to attract joint collaborations between universities and business for a capital prize of £20 million focused on digital skills and computer science.

Cyber Skills Programme

A NEW PROGRAMME TO BUILD CYBER SKILLS FOR THE FUTURE IN BRITAIN.

This will include identifying young people with cyber talent and providing them with training, after-school expert mentoring sessions and paths into a variety of cyber careers.

New higher and degree level cyber apprenticeships focussed around protecting key sectors like finance and energy.

Regulatory Framework

A STRONGER REGULATORY FRAMEWORK

Stronger regulation in sectors defined as Critical National Infrastructure.

Through the National Cyber Centre, a new programme of work with businesses across the economy to ensure that they have the right defences in place.

Stronger Cyber Sector

A STRONGER CYBER SECTOR

Creation of a new Cyber Innovation Centre in Cheltenham to house cyber start-ups in their early months, giving them the best possible support and drawing on the cyber talent and resource in the South West.
