

BUSINESS CONTINUITY – ensuring that internal Business Continuity Arrangements are focussed on identifying and combatting cyber vulnerabilities and challenges

DESIGN PRINCIPLES

- **Use the Business Continuity Management Toolkit**
- **Understand the Local perspective**
- **Undertake regular Cyber Security Planning**
- **Maintain Incident Response and supervisory control systems through out your organisation**

Think Cyber Think Resilience

Business Continuity		
DOCUMENTATION		
Name	Link	Description
Business Continuity Management Toolkit	Here	BCM is an established part of the UK's preparations for managing risks faced by organisations, whether from internal system failures or external emergencies such as extreme weather, flooding, terrorism, or infectious diseases. <u>The Civil Contingencies Act 2004</u> recognised its importance by requiring frontline responders to maintain internal BCM arrangements and local authorities to promote BCM to commercial and voluntary organisations.
Business continuity planning	Here	The Business Continuity Plan (BCP) is an essential part of any organisation's response planning. It sets out how the business will operate following an incident and how it expects to return to 'business as usual' in the quickest possible time afterwards.
Business resilience Planning considerations	Here	The City of London's Security and Contingency Planning Group have developed a series of models for businesses in the City with the development and exercising of their business continuity plans including cyber security incidents.
Business Continuity Institute (BCI)	Here	The Business Continuity Institute (BCI) Established in 1994, the BCI has established itself as the leading membership and certifying organization for Business Continuity (BC) professionals worldwide.
